

FONIX

iSpeak™ 1.0 for Apple iPhone™

Fonix iSpeak for Apple iPhone gives you “freedom of speech” to enrich your iPhone experience

iPhone 3G™ and OS 2.0

Fonix iSpeak 1.0 for Apple iPhone 3G and original iPhones running OS 2.0 enables you to call contact names using only your voice. iSpeak recognizes voice instructions without going through an enrollment or training process. It's automatic! Dial phone numbers by speaking the number or simply say the contact's name followed by a location designator (home, work, or mobile: e.g., “Call John Smith at work”). Fonix iSpeak also performs accurately in noisy environments.

Fonix iSpeak works fast on the iPhone

Fonix iSpeak interacts with your iPhone, gathering phone contact information in real time. There's no waiting for a server to respond, and no worrying about a server staying connected. Fonix iSpeak provides a “hands-free” experience for an easier, faster and safer way to call.

Fonix iSpeak Initial Release

- Fonix iSpeak runs on the iPhone, not on a server, which speeds up recognition and eliminates waiting.
- No “training” is required (words, names, and commands are automatically recognized after installation).
- Footprint is small (minimal memory requirement).
- Dial by name or number.
- Interact with a natural sounding voice.
- Language: English.
- Max number of contacts: 1500.
- Supports headset microphone.

Fonix iSpeak Future Release

- Search the Web for local restaurants, listen to weather conditions, get Google map directions, etc.
- Send a recorded voice note for email response.
- Open a contact list.
- Launch music and videos.
- Future languages: French, German, Italian, Spanish, Chinese, Korean, and Japanese.
- Bluetooth support (not supported now due to limitations on the Apple iPhone).

Hardware and Operating systems supported

- Apple iPhone 3G or iPhone with OS 2.0.

Pricing & Availability

- Now available in the Apple App Store™ for \$9.99.

Call 801-553-6600 and say “Sales” or “iSpeak” for more information, or email ispeaksupport@fonix.com.
